PROFILE

Master of Business Analytics candidate (GPA 4.23, Kelly Dye Scholar) with formal training in statistical learning, machine learning, optimization, and analytical infrastructure. Builds governance-aware AI architectures integrating agent orchestration, policy enforcement, and decision routing. Combines four seasons of operational leadership with quantitative systems design and competitive innovation experience, including RBC HubHack 2025.

CORE COMPETENCIES

Technical: Python | R | SQL | Power BI / Tableau | AWS Cloud | Excel (Advanced) | LangGraph | FastAPI

Quantitative: Statistical Learning | Machine Learning Pipelines | Linear Algebra | Optimization | Probability & Bayesian Methods

Systems & Operations: Agent Orchestration | Governance Middleware | Workflow Analysis | Requirements Analysis | Risk Monitoring | Team Supervision

PROFESSIONAL EXPERIENCE

Nova Scotia Lifeguard Service

Beach Captain | 2021 – 2025

- Supervised lifeguard teams across high-traffic beach environments, maintaining accountability for public safety, equipment deployment, and daily operational flow.
- Monitored environmental conditions, population density, and real-time risk indicators to guide prevention strategy and resource allocation.
- Coordinated emergency response during aquatic incidents, directing staff operations and liaising with external emergency services.
- Ensured team compliance with NSLS operational procedures, provincial safety standards, and organizational protocols.
- Maintained accurate incident documentation, environmental logs, and operational statistics to support reporting requirements.

PROJECTS & COMPETITIONS

- **Agentic Governance Systems (2026):** Designed AI governance architectures featuring agent orchestration, policy enforcement, escalation routing, audit logging, and human-in-the-loop approval workflows. Built a Health Orchestrator using LangGraph with governance middleware and executive observability dashboards.
- **RAG Architecture Evaluation (2026):** Conducted comparative research on Vanilla RAG vs. Agentic RAG architectures, evaluating retrieval coverage, token efficiency, latency, and explainable reasoning.
- **BestWe — Product & Design Consultant (2022–2023):** Contributed UX research for an AI-powered workforce alignment platform. Applied a behavioral psychology lens to cross-examine content validity and user experience across product packages, collaborating with an international development team across time zones.
- **Halifax Arctic Gateway Dashboard:** Built a data visualization project analyzing strategic shipping route potential and Arctic trade forecasting for Atlantic Canada.
- **Hackathons:** RBC HubHack 2025 — competed in innovation challenge focused on operational efficiency through data-driven decision systems. CGI Hackathon — collaborative problem solving and systems design under competitive conditions.

EDUCATION

Saint Mary's University | *Master of Business Analytics* | Expected May 2026 | GPA 4.23 | Kelly Dye Scholar

Acadia University | *BA Psychology & Business Administration* | 2024
